This response provides a comprehensive system characterization and a high-fidelity mockup using **Tailwind CSS**.

Part 1: System Characterization

System Name: MedSync Staff Manager
Primary Goal: To provide a centralized, real-time platform for hospital administrators to manage human resources, optimize shift distributions, and monitor departmental performance.

Key Objectives:

1. **Operational Efficiency:** Automate shift rotations to reduce scheduling conflicts and administrative burnout.
2. **Compliance & Safety:** Ensure that critical departments (ER, ICU) always meet the minimum required ratio of specialized staff.
3. **Data Centralization:** Maintain a "single source of truth" for staff credentials, contact details, and attendance history.
4. **Real-time Visibility:** Provide leadership with instant insights into staff availability and current hospital occupancy status.

Part 2: UI/UX Design (HTML & Tailwind CSS)

The following code is a single-file prototype. I have used a Sidebar-based navigation and created distinct sections for the **Dashboard**, **Staff Directory**, and **Shift Scheduler**.

Note: You can copy this into an `.html` file and open it in any browser. It uses the Tailwind CDN for styles.
